SYNOPSIS

Software Engineer **with 7 years and 7 months of experience** in backend development, primarily **using PHP, Laravel, Symfony**, and **SQL**. Experienced in developing **RESTful APIs**, **microservices**, **database design, automated testing** with PHPUnit, and modernising legacy applications. Familiar with frontend technologies including **Vue.js** and **Angular**, and development tools such as **Docker**, **Git, and Grafana**. Currently using **Claude Code** to support everyday development tasks, **reviewing AI-generated code** for correctness, maintainability, and alignment with project requirements. Expanding backend expertise through hands-on projects using **Go, gRPC**, and **Protocol Buffers**. Experienced in **Agile environments**, collaborative **code reviews**, and delivering maintainable software solutions, with working knowledge of **AWS cloud services**.

AREAS OF EXPERTISE

- Backend Frameworks & Technologies
  - PHP, Go (**Golang**), **RESTful API Development**
  - Laravel, Symfony, Gin, Slim, Lumen, CodeIgniter
  - **OOP**, **SOLID** Principles, **Design Patterns**
  - **ORM**: Eloquent (Laravel), Doctrine (Symfony)
  - **Concurrent Programming, Goroutines, Channels**
  - **Webhooks, Jobs, Queues**
  - **gRPC, Protobuf**
- Databases
  - **MySQL, PostgreSQL, NoSQL, Redis, Elasticsearch**
  - Database design and optimization
- Testing & Quality Assurance
  - **PHPUnit**, **TDD**, Selenium WebDriver
- Frontend Technologies
  - Vue.js, Angular
  - JavaScript, jQuery, AJAX
  - HTML5, CSS, Bootstrap, Tailwind CSS
- AI-Assisted Development
  - **Claude Code**, AI Coding Agents
  - Refactoring, Debugging and Test Generation
  - AI-Generated Code Review and Validation
- DevOps, Monitoring & Development Tools
  - **Rancher (Kubernetes), Jenkins**, Git
  - Docker, **Makefile**, **Webpack**
  - **Grafana**, Linux CLI, WSL2, Postman
- Other Skills
  - **UML**, **OpenAPI, Scramble**, Agile (Scrum)

GITHUB PROJECTS

- Currency Converter CLI Tool – Core PHP CLI tool for currency conversion and profit calculation.
- Telco plans and applications – Built with Laravel 11 and includes PHP unit tests
- Health Management – Built with Laravel 11. It uses Docker and makefile to make development easy
- Lumen JWT Auth API – User authentication using Lumen with JWT.
- MVC using Core PHP – Custom MVC structure using OOP, PDO, Composer, and routing.
- Choicedeck OpenAI API – Laravel 12 project with Vue3, TypeScript, Inertia 2, shadcn-vue and Vite
- Laravel Modular Multi-Tenant API – Demonstrates modular architecture and database-per-tenant isolation.
- Go Shift Scheduling gRPC API – Go project exploring shift scheduling with gRPC and Protocol Buffers.

WORK EXPERIENCE

Aussie Broadband

Software Engineer Level 3 | Jan 2026 – Present [10 months] (12 Months Contract - Full time)

Tech Stack:

- Backend: PHP, Laravel (v13), RESTful APIs
- Frontend: Vue.js
- Database: SQL, Redis, **Elasticsearch**
- Testing: PHPUnit
- DevOps & Tools: **Rancher**, Docker, Grafana, Laravel **Horizon**, Laravel **Health**, Kubernetes
- Tools: GitLab, Slack, Postman, Colima, Claude Code
- Methodology: Agile (Scrum)
- Operating Systems: MacOS

Key Contributions:

- Developed and maintained **RESTful APIs** within a **modular Laravel application** for a **multi-tenant environment**, supporting communication between backend services.
- **Modernised legacy code** by migrating selected modules to Laravel, improving maintainability and aligning them with the application's modern architecture.
- Created **Grafana dashboards** with structured log
- Used Claude Code for **AI-assisted development**, reviewing and validating AI-generated code to support implementation and maintain code quality
- Used **Rancher(Kubernetes)** to access pods, troubleshoot issues, port-forward database connections, and support UAT deployments.

Sequoia Financial Group

Software Engineer Level 2 | Dec 2022 – Jan 2026 [3 year 2 months]

Tech Stack:

- Backend: PHP, Symfony (v3.4 to v5.4 upgrade), Slim, **Microservices**, **OAuth2**
- Frontend: Vue.js
- Database: SQL, **SleekDB**(NoSQL), **Redis**
- Testing: PHPUnit, TDD, Selenium WebDriver
- DevOps & Tools: Docker, Git, Webpack, Makefile
- Tools: Bitbucket, Jira, Confluence, Slack, PuTTY, Postman
- Methodology: Agile (Scrum)
- Operating Systems: Windows, WSL2

Key Contributions:

- Developed and maintained RESTful APIs in a microservices architecture, enabling secure and scalable inter-service communication.
- **Upgraded Symfony** from v3.4 to v5.4.
- Integrated third-party payment gateways.
- Worked with Dockerized environments and WSL2 for smooth local development.
- Contributed to unit and feature testing using PHPUnit and Selenium.
- Integrated APIs on the frontend using Vue.js.

Gateway Group of Companies

Senior Software Engineer | April 2021 – June 2022 [1 year 3 months]

Tech Stack:

- Backend: PHP, Laravel
- Database: SQL
- Frontend: AJAX
- DevOps & Tools: Git, **Jenkins**, **Azure Dev Tools**, PuTTY
- Cloud & Others: **AWS EC2**, Postman
- Methodology: Agile (Scrum)
- Operating System: Windows

Key Contributions:

- Developed custom **data filtration** APIs to support client-specific reporting and analytics.
- Maintained and enhanced the client's web application for the automobile industry, adding new features and supporting existing functionality.
- Communicated effectively with clients to understand requirements and provide ongoing technical support.
- Participated in Agile sprint planning, team discussions, and task estimations.

AGILE Infoways Pvt. Ltd.

Web Developer | June 2019 – March 2021 [1 year 10 months]

Tech Stack:

- Backend: PHP, Laravel, CodeIgniter, Lumen
- Frontend: Angular, JavaScript, jQuery, AJAX, Bootstrap
- Database: SQL
- Tools & APIs: Git, Postman, Google APIs, **Stripe**, Mailchimp, **DigitalOcean**, PuTTY, Monday.com
- Methodology: Agile (Scrum)
- Operating System: Ubuntu

Key Contributions:

- Created RESTful APIs for the frontend team to consume in Mobile applications.
- Integrated third-party APIs including **Google Maps** (location services), Stripe (payment processing), and **Mailchimp** (email campaigns).
- Designed and maintained database schemas and wrote optimized SQL queries.
- Built and maintained features such as **notifications**, **SMS**, **email**, **deep links**, **payment gateway** integration, and scoring systems.
- Worked on API integration in Angular.

ArsenalTech Pvt. Ltd.

Intern | December 2018 – May 2019 [6 months]

Tech Stack:

- Backend: PHP, Laravel, WordPress
- Frontend: jQuery, JavaScript, AJAX
- Database: SQL

Key Contributions:

- Helped with backend development using Laravel and Core PHP.
- Worked on basic frontend tasks using jQuery and AJAX.
- Learned how to customize WordPress and manage databases.

COURSE CERTIFICATIONS

- **Ultimate AWS Certified Cloud Practitioner CLF-C02 2025**
- **Complete Vue Developer Bootcamp (Pinia, Vitest)**
- **Symfony (PHP)**

EDUCATION

- Master of Computer Science and Information Technology (MSCIT)
  - from K.S. School of Management, Gujarat University (December 2018)
- Bachelor's in computer science and information technology (BSCIT)
  - form K.S. School of Management, Gujarat University (April 2017)
